

Quisvi Indústria e Comércio de Produtos Químicos Ltda is committed to meeting the requirements and continuously improving the effectiveness of the quality management system as a success factor for producing and supplying products for the polymer transformation industry.

We seek a competitive edge to be recognized as a trustworthy brand committed to meeting customer, legal, and applicable quality management system requirements to obtain results that benefit everyone.

The Quality Management System Concepts are:

Customer satisfaction: meeting or exceeding customer expectations and needs in a lasting and balanced manner.

Technology and development: developing products and production processes seeking to generate better results, reducing non-conforming products as much as possible, and optimizing the time available for production.

Growth: Sustaining and developing business growth.

Training: We verify the competence, train if necessary, and commit our employees to improving the company's operational performance and avoiding employee turnover.

Scope:

Development, Manufacturing, and Commercialization of Chemical Additives for Elastomers and Plastics. Roca Sales, November 22, 2023.

Lucas Leonardo - Diretor Industrial/Comercial
